

### PAR Meter Loaner Program and Agreement

The Apogee MQ-510 is a precise instrument used to measure PAR in the aquarium. The PAR meter is owned by the Colorado Aquarium Society and care should be taken to avoid damage to the instrument. Repairs are costly and can be avoided if each member takes care to use the instrument properly and always store it in the included hard sided carrying case.

Please read the following details of the loaner program for this PAR meter. You **MUST** agree to the guidelines in order to borrow the PAR meter. Please sign the bottom of the agreement and return the completed form.

I, \_\_\_\_\_, agree to the PAR meter loan rules as follows:

- I am submitting a refundable deposit for the full replacement price of the meter. If the meter should require repairs, the repair cost will be deducted from the deposit and the remainder refunded to me.
- The deposit of \$550.00 will be paid via credit card. Once the PAR meter is returned and checked to be in good working condition by a CAS Board member, the deposit will be returned to me.
- The PAR meter exchanges will be in person at CAS meetings, but arrangements can be made for pickup/drop-off with a CAS Board member as needed.
- Loan period is 1 month (the time between monthly meetings). I will coordinate with a CAS Board member if I wish to return the PAR meter earlier.
- If I have any questions about the loaning process, I will contact a CAS Board member.
- I will return the PAR meter with the following included items:
  - Apogee MQ-510 PAR Meter
  - Sensor on a cable
  - Sensor wand
  - Instruction manual
  - Carrying case
